

Guide to installing the NYM desktop wallet for the MAC OS operating system including the M1 processor

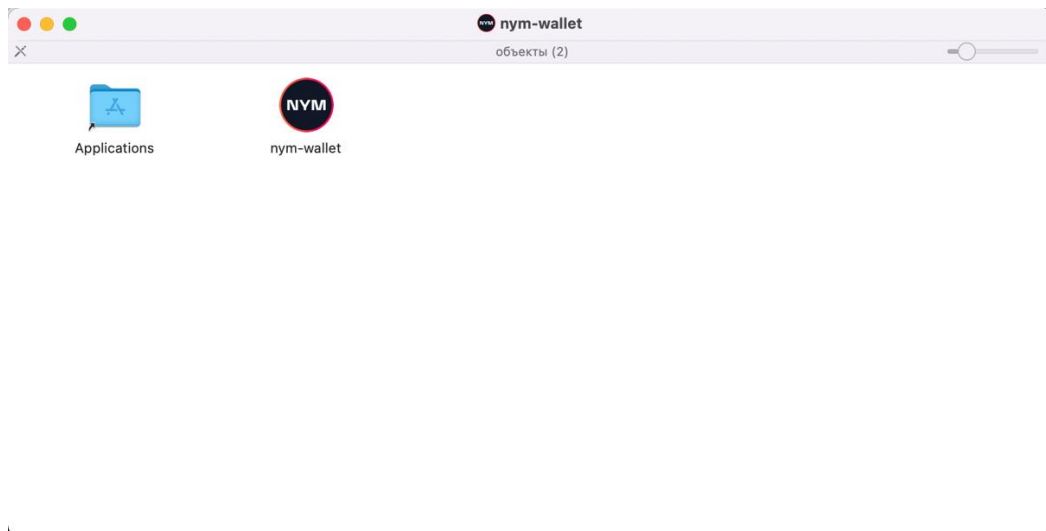

1. To get started, go to the page <https://nymtech.net/download/wallet>

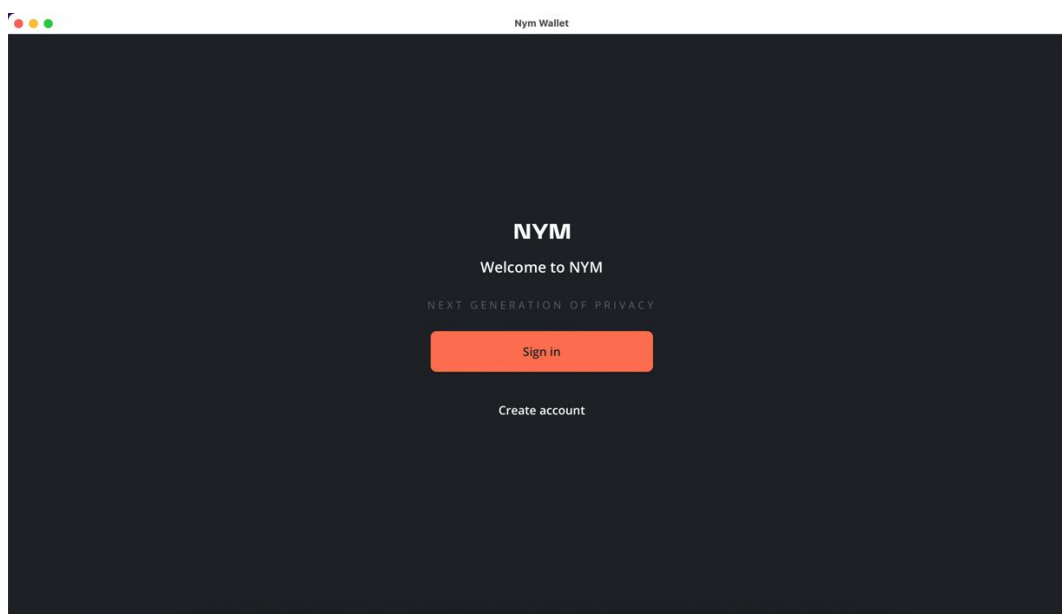

2. We need to choose our operating system. We begin the download process and save it to your PC.

3. After that, unpack and install in the desired directory

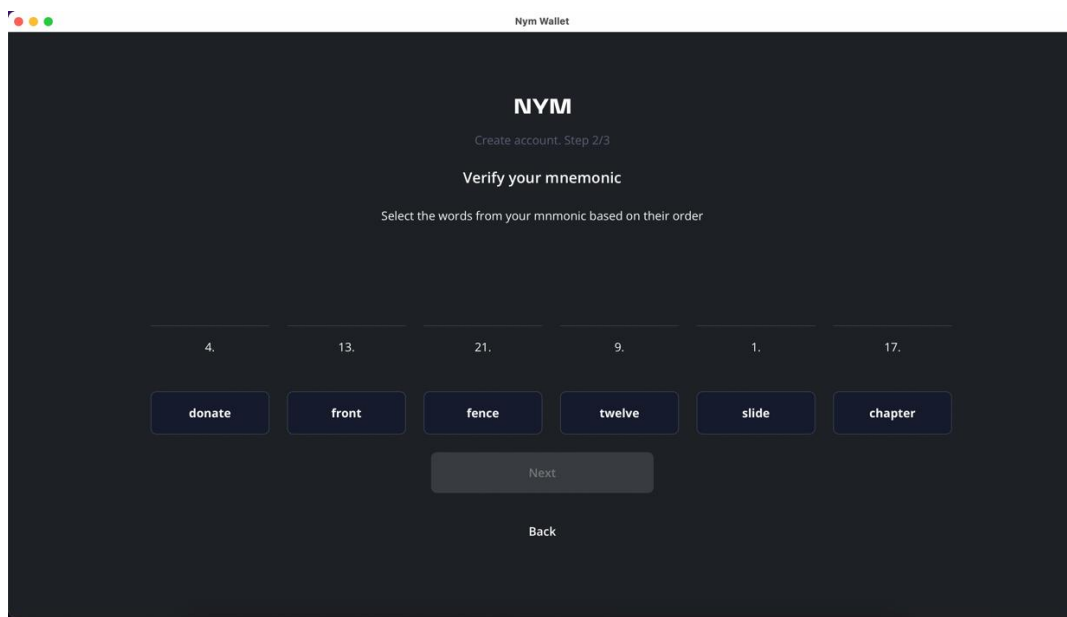

4. Next we will need to create a new wallet, click the Create account button

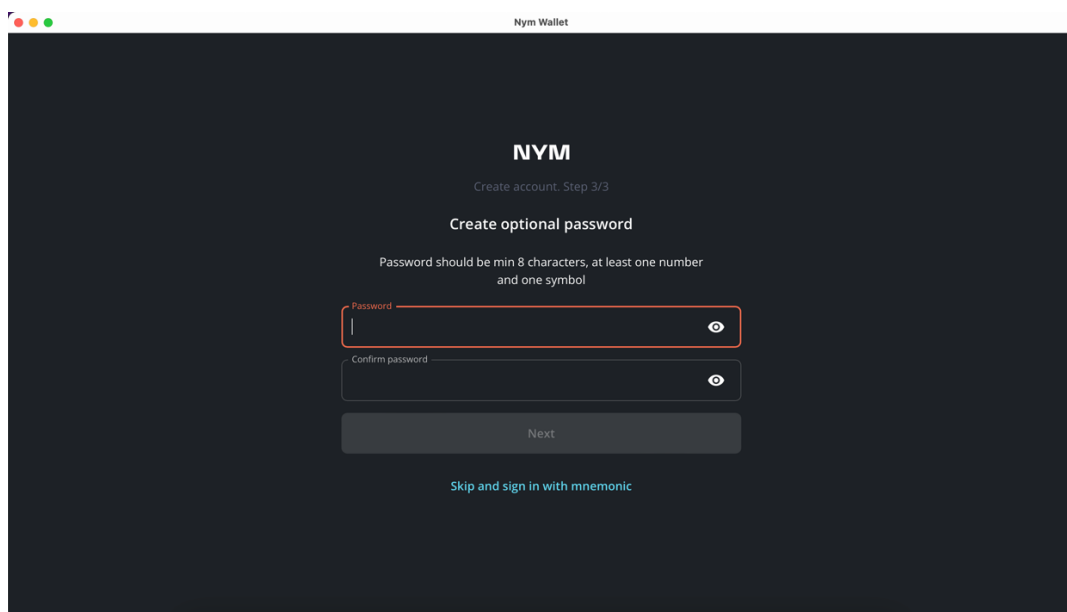

5. After this, your mnemonic phrase will appear - 24 words that need to be written down in a safe place

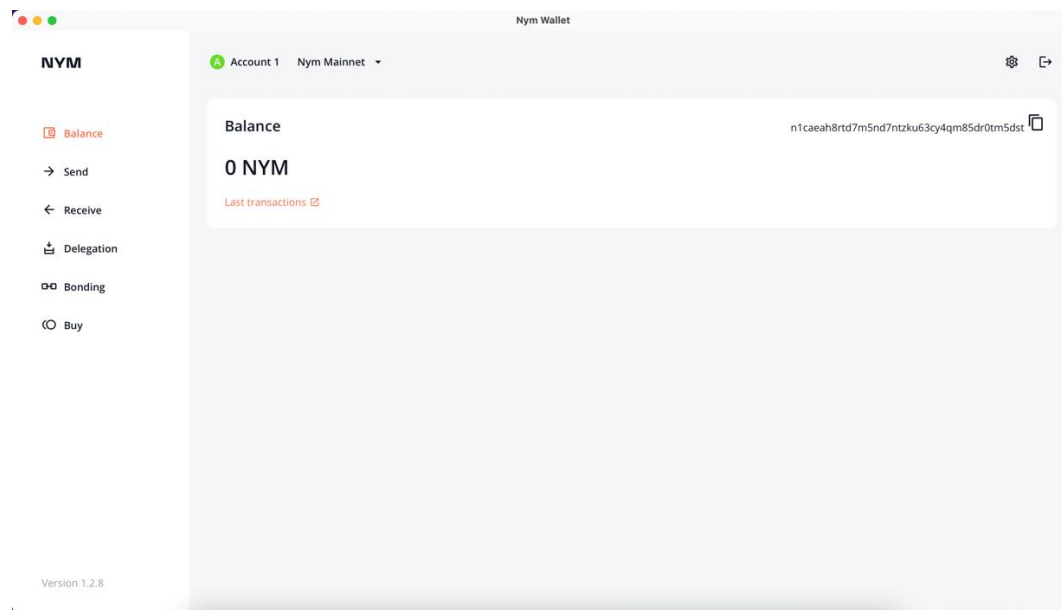

6. After this, you will need to mark the desired order of the entered words

7. Next we come up with a password for reliability, use numbers and special symbols

8. After confirming the password, we will be taken to the main menu of the wallet

There are tabs inside the wallet

- Balance where you can see the balance of your wallet. On the right you will see your wallet address.
- Send on this page you can send your \$NYM to the desired address
- Receive funds into your account using QR CODE
- Delegation to delegate their tokens to the validator
- Bonding to configure MIX Node
- Buy here you will find information on buying the NYM token
